LUBRICATION

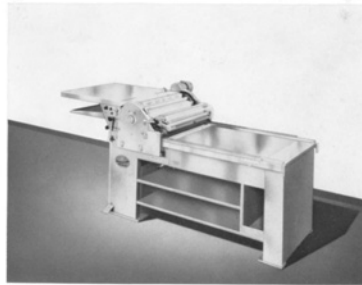

S.A.E. 20 OIL IS RECOMMENDED FOR ALL MOVING PARTS, OIL WEEKLY.
 ALL BALL BEARINGS ARE PACKED IN GREASE AND REQUIRE NO FURTHER ATTENTION.
 A LIGHT OIL SHOULD BE KEPT ON CHAINS AND IMPRESSION RAILS AT ALL TIMES.

**Vandercook SP Series
TEST AND PROOF PRESSES**

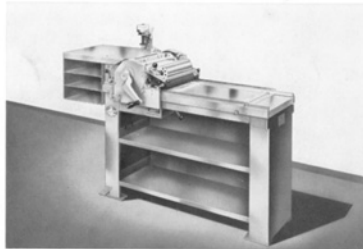

There are five machines in this series. The SP25 is available with a hand or power driven impression cylinder. All except the SP13 are available with power driven inking systems.

The SP15, SP20, SP25 and SP33 are designed for pulling proofs of reproduction quality—including transparencies. The SP25 will prove a full newspaper page in stereo chase without printing the chase. The SP33 is ideal for checking printing surfaces, registering, lining up and correcting automatic cylinder press forms in chases up to 33" wide—and, when equipped with a Vandercook Vacuum Plate Base, is an excellent machine for testing thin wrap-around plates.

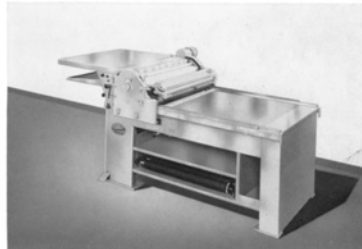

The Vandercook SP13 is a precision hand driven galley proof press equipped with a packed impression cylinder and a three-roller precision inking system. The press inks both ways of its travel, and prints both ways.

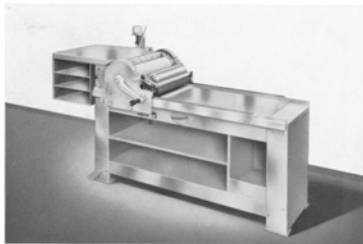

VANDERCOOK SP25 HAND OR POWER TEST PRESS
● Maximum Sheet Size—24½" x 28"

VANDERCOOK SP15 HAND TEST PRESS
● Maximum Sheet Size—14¾" x 20"

VANDERCOOK SP33 POWER TEST PRESS
● Maximum Sheet Size—33" x 29½"

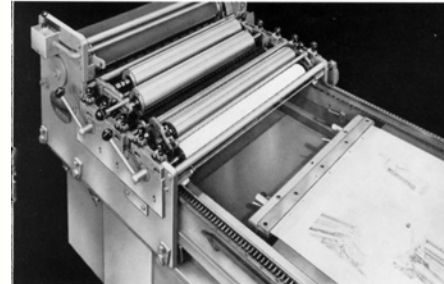

VANDERCOOK SP20 HAND TEST PRESS
● Maximum Sheet Size—19½" x 28"

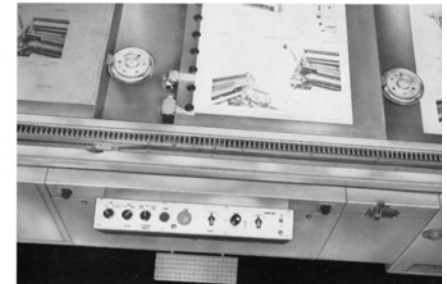

VANDERCOOK SP13 HAND GALLEY PROOF PRESS
● Maximum Sheet Size—12¾" x 28"

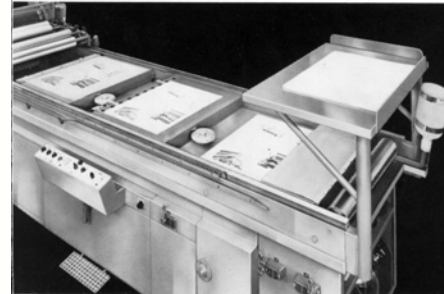

Vandercook 20-26 Flat Bed Offset Press

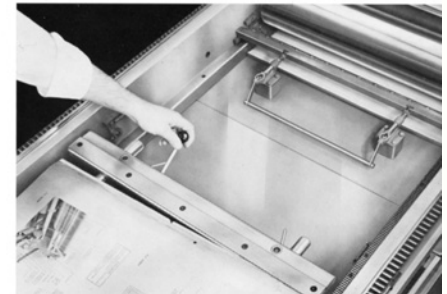

Inking and dampening system—plate clamp.

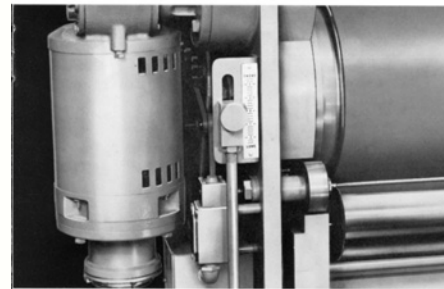

Control panel—gripper pedal—bed height adjusting wheels (no compensating adjustments required)—grippers and micrometer sheet guides.

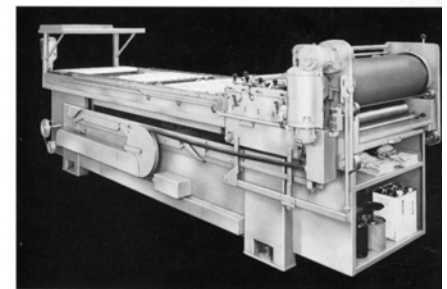

Convenient stock table and delivery tray—adjustable speed water supply drum with Baldwin water level system.

Quick acting plate clamp (not necessary to bend plate)—doctor blade for automatic washup.

Adjustment for printing short or long.

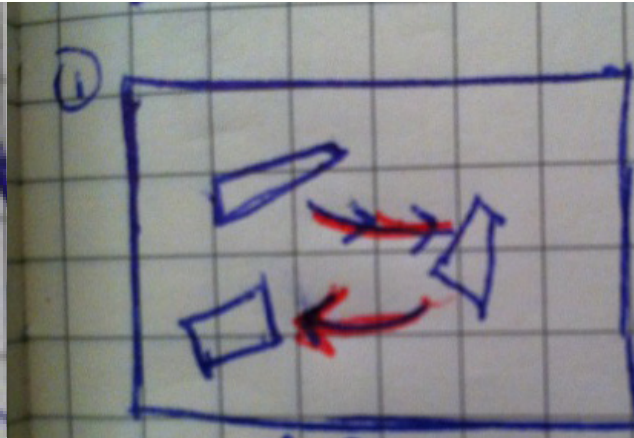

Power cable take-up system.

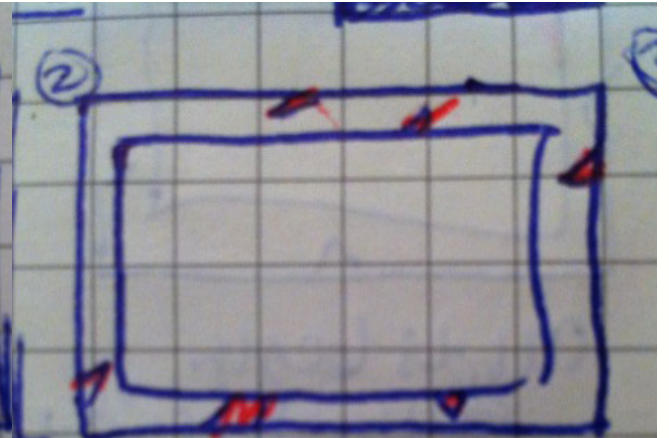

Under development—Vandercook RO4 Rotary 4-Color Offset Proof Press
